CORE COMPETENCIES

TimelyText is a specialized provider of technical writing consultants and project services. For more than 20 years, we've focused on building a network of experts to deliver exceptional technical documentation services tailored to meet the unique needs of your business.

THE TIMELYTEXT DIFFERENCE

EXPERTISE AND EXPERIENCE

Since 2003, TimelyText has employed *hundreds* of technical writers, giving us an unparalleled network of consultants with diverse experiences across industries like government, pharma, tech, insurance, manufacturing and more.

PROVEN, VETTED CONSULTANTS

No matter the industry, no matter the objective — we will provide a vetted professional with a proven track-record of success in the areas you need critical support. TimelyText associates understand contracting and show up ready to contribute on Day 1 with minimal ramp-up.

COLLABORATIVE APPROACH

We provide the talent, but you ultimately choose who fits your team personally and professionally. TimelyText lives by the "*Two-Customer Philosophy*", remaining in contact throughout the engagement to ensure our client is pleased with the work, while also providing non-billable support to our consultants behind the scenes.

RIGHT ON TIME

Whether you need an SOP writer for a six-week project or an expert in SDK/API documentation to help long-term, we have a solution. No matter the timeline, we only bill for actual hours worked.

RELATIONSHIPS MATTER

We're honored the majority of our clients and associates work with TimelyText for multiple engagements. We'll grow to understand the needs and dynamics of your organization, and in turn, provide you with consultants whose skills and personalities augment your team's chances for success.

YOUR GOVERNMENT PARTNER

Over two decades, TimelyText consultants have performed in mission-critical roles for government clients ranging from creating vital documentation that is used to help evaluate the effects of explosive ordinance to writing technical specs that enabled ABB to win a major contract with the FAA.

Thanks to our specialization, we understand your professional communication needs beyond keywords on an RFP, and we'll dig deeper to provide the right consultants to get the job done — on time, the first time.

Even as a small business, we're capable of both building teams to serve clients directly or providing our niche expertise in joining your project as a teaming partner.
